

# GOOD LEADERSHIP AND WORK IN THE DIGITAL TRANSFORMATION

## COMPARATIVE APPROACHES AND INSTRUMENTS TO LEADERSHIP DEVELOPMENT IN THE DIGITAL AGE

### Skills and Competences for Leadership and Digital Transformation

2<sup>nd</sup> March 2022

Bernd Dworschak  
Anna Fehrle

# Fraunhofer IAO and IAT of the University of Stuttgart

## Overview

### Founded:

IAO – 1981

IAT – 1991

### Institute management:

Prof. Dr.-Ing. Prof. e. h. Wilhelm Bauer  
(managing)

Univ.-Prof. Dr.-Ing. Oliver Riedel

apl. Prof. Dr.-Ing. habil. Anette Weisbecker

Dr.-Ing. Florian Herrmann

■ **Financial volume:** €46,7m. \*

■ **Personnel:** 650 employees\*

\* 2020 Data, inkl. IAT of the University of Stuttgart

# Our Vision

## Shaping the future of work – for the benefit of people

- We are the leading competence partner **for solving applied research tasks** in the fields of work design and technology management.
- We take a **holistic view of the interaction between work and technology** and thus create practical solutions for our customers.
- We accept our **responsibility towards society and the environment** and advocate **sustainability**.
- We **encourage our employees** in their scientific ambitions and provide **excellent working conditions**.

# Team Competence Management

## Work priorities

### Competences

- Changing competence and job profiles in and by digitisation
- Digital competence

### Learning

- Learning of the future – Future of learning
- (New) Learning formats in and by digitisation

### Work design

- Impact of digitisation and AI on work
- Design of work and assistance systems conducive to competences and learning

# Our leading research questions

How is the working world changing as a result of deploying new technologies?

What does this mean for work organization, human labor and management?

What skills are required from leaders and workers for coping with the new challenges?

How can learning be designed to enable leaders and workers for coping with the working world of tomorrow?

# Project "eLLa4.0"

## Modification of Leadership Models

- Scenarios and options
- Skill requirements
- Interactional skills

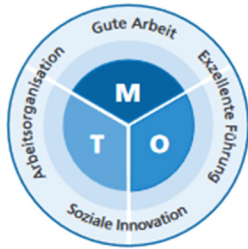

## Qualification in the Labs

- Development of specific qualification offers
- Interactional skills for leaders in the DFA Demonstration Factory Aachen and the Future Work Lab in Stuttgart

## Specific Solutions for Companies

- Individual leadership concepts and interactional skills in the course of socio-digital transformation within the 4 use cases

- Implementation of use cases
- Development of a new format for cross-company oriented demonstration factories (Labs) with main emphasis on interactional skills
- Continuing education offer for excellent interactional leadership
- Practically proven transfer instruments (learning events and workshops)

## Demonstrators

E-Learning

Learning Labs

Social Simulation

Multimed. Learning Offers

## Dissemination

## Modification of Leadership Models

# Skills and competences for Leadership and Digital Transformation

## Modification of Leadership Models

### Digital & media literacy

- Communicate effectively, even across distances
- Digital skills
- Technological know-how/acquisition of new knowledge
- Understanding of data, privacy and processes
- Creative thinking
- Media literacy

### Analytical and planning skills

- Good comprehension to fully understand different situations
- Problem-solving skills
- Further development of technologies in professional and activity fields
- Coordination

### Business skills

- Strategic thinking
- Strategic competence about changes in the working world
- Dealing with data and the question of what potential is associated with the data for the organization

### Leadership skills

- Employees expect a counterpart at eye level
- Develop a framework in which people can play to their strengths
- Health-promoting leadership
- Dealing with people, developing them, recognizing their potential and dealing with the differences between employees (e.g., attitudes, skills)
- Coaching; respond to the potential, lead individually and take your time
- Sensitivity and the ability to lead in a situational manner
- Decision-making skills and knowledge of how these can prevail

### Professional expertise

- Basic understanding of process knowledge / specialist knowledge
- Practical knowledge about the respective processes, problems and framework conditions

Skills and  
competence  
clusters

Interaction  
competence

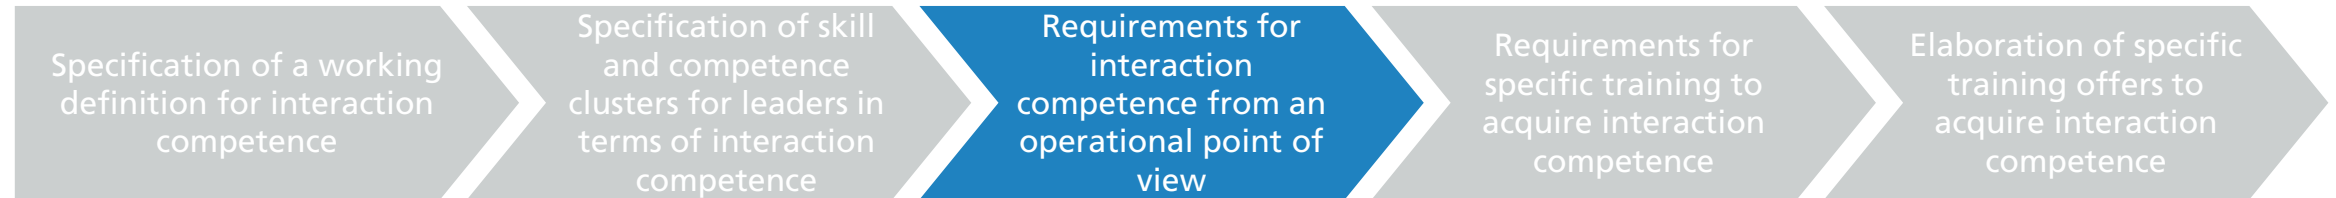

### Personal skills

- Personal development of leadership style
- Leadership at a distance
- Ability to reflect critically on oneself and then make decisions
- Communication
  - Communication skills (only through communication one can reflect critically on oneself, which requires exchange with others)
  - Communication strength
  - Appreciating people, encouraging communication
  - Introduce and establish new, changed forms of communication
  - Discursive coordination, where you make things happen by conversation / sharing information / arguing / bringing people together
  - Constitute an understanding of communication and explanation, the comparison of expectations and the conveying of strategies
  - Ability to listen and understand the other person
- Political skills (ability to place and enforce one's own needs in the right place)
- Emotional intelligence / competence
- Conflict resolution skills
- Motivation
  - Motivation and coordination of employees
  - Methods for motivating employees
  - Able to give constructive criticism as well as praise and appreciation
- Being able to endure uncertainty (VUCA), socio-emotional self-competence
- Collaboration skills
- Able to give constructive criticism as well as praise and appreciation
- Attitude between laissez faire and collaborative (relaxed and at eye level)
- Willingness to change (flat hierarchies, etc.), also regarding an innovative design of leadership
- Collaboration across subject and organizational boundaries / networking / exchange
- Support in the change process / navigation, provide more leadership in the sense of orientation
- Confidence to go in a certain direction and having the necessary openness to do so
- Willingness and ability to learn
- Personal maturity
- Reverse mentoring, also allow being led by younger people
- Systemic thinking

# Skills and competences for Leadership and Digital Transformation

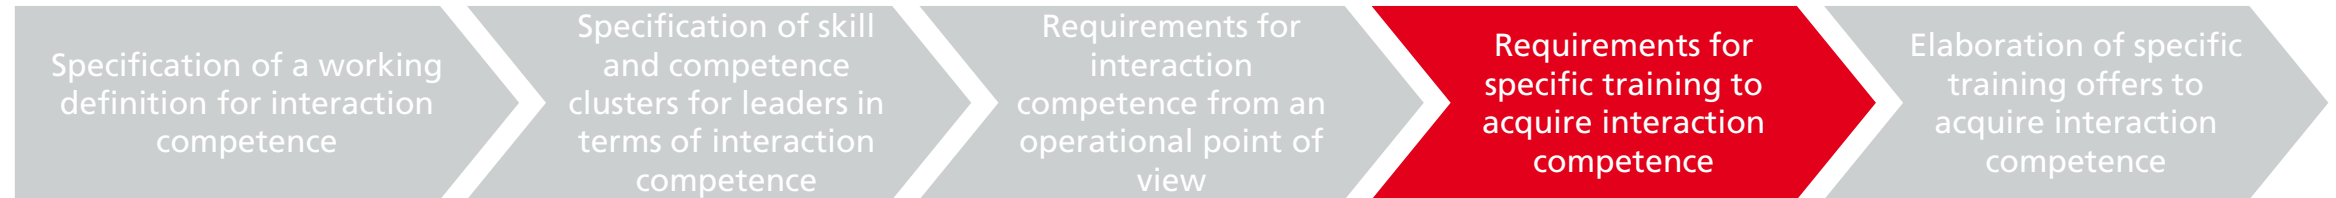

## Modification of Leadership Models

Media competence	Comprehension	Ability to lead in a situational manner	Process knowledge / specialist knowledge	Socio-emotional competence	Willingness to learn
Reflection on which medium is best in a specific situation. Selection from the toolbox.	To fully comprehend/understand the given situation.	Dealing with people, developing them (further), recognizing their potential and dealing with the differences between employees.	Basic understanding.	Personal development of leadership style, being able to endure uncertainty (VUCA).	Reverse monitoring, letting younger people guide you, systemic thinking.
Creative thinking	Problem-solving competence	Strategic competence	Strategic thinking	Decision-making ability	Coaching
Experience	Communication	Conflict solving	Willingness to change	Support in change processes	Collaboration competence and trust

# Skills and competences for Leadership and Digital Transformation

## Qualification and training solutions

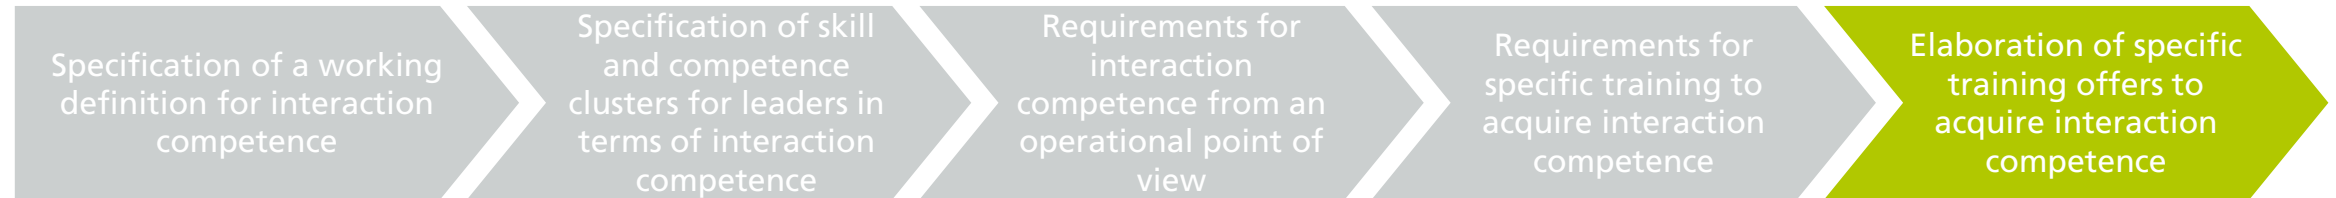

**Learning formats that build on one another are particularly suitable for a targeted build-up of skills in the complex environment of Industry 4.0 which include both e-learning and face-to-face units and are consistently linked to one another via a learning stream.**

### ➤ **Blended learning course concept**

- Web-based training (WBTs)
- Webinars
- Face-to-face learning
- Accompanying learning platform

# Skills and competences for Leadership and Digital Transformation

## Qualification and training solutions

### Pillar 1: Leading Yourself

***Interactional skills  
on intrapersonal level  
(interaction with self)***

Being able to reflect leadership role in the context of a digitized work environment, and to foster a digital culture and the commitment of their employees within digitalization.

### Pillar 2: Leading People and Teams

***Interactional skills  
on interpersonal level  
(interaction with employees)***

Being able to connect with and connect other people to collaborate in a digital and virtual work environment, and to help employees and teams to transform for modified or new digitalized job roles and integrate learning into daily work.

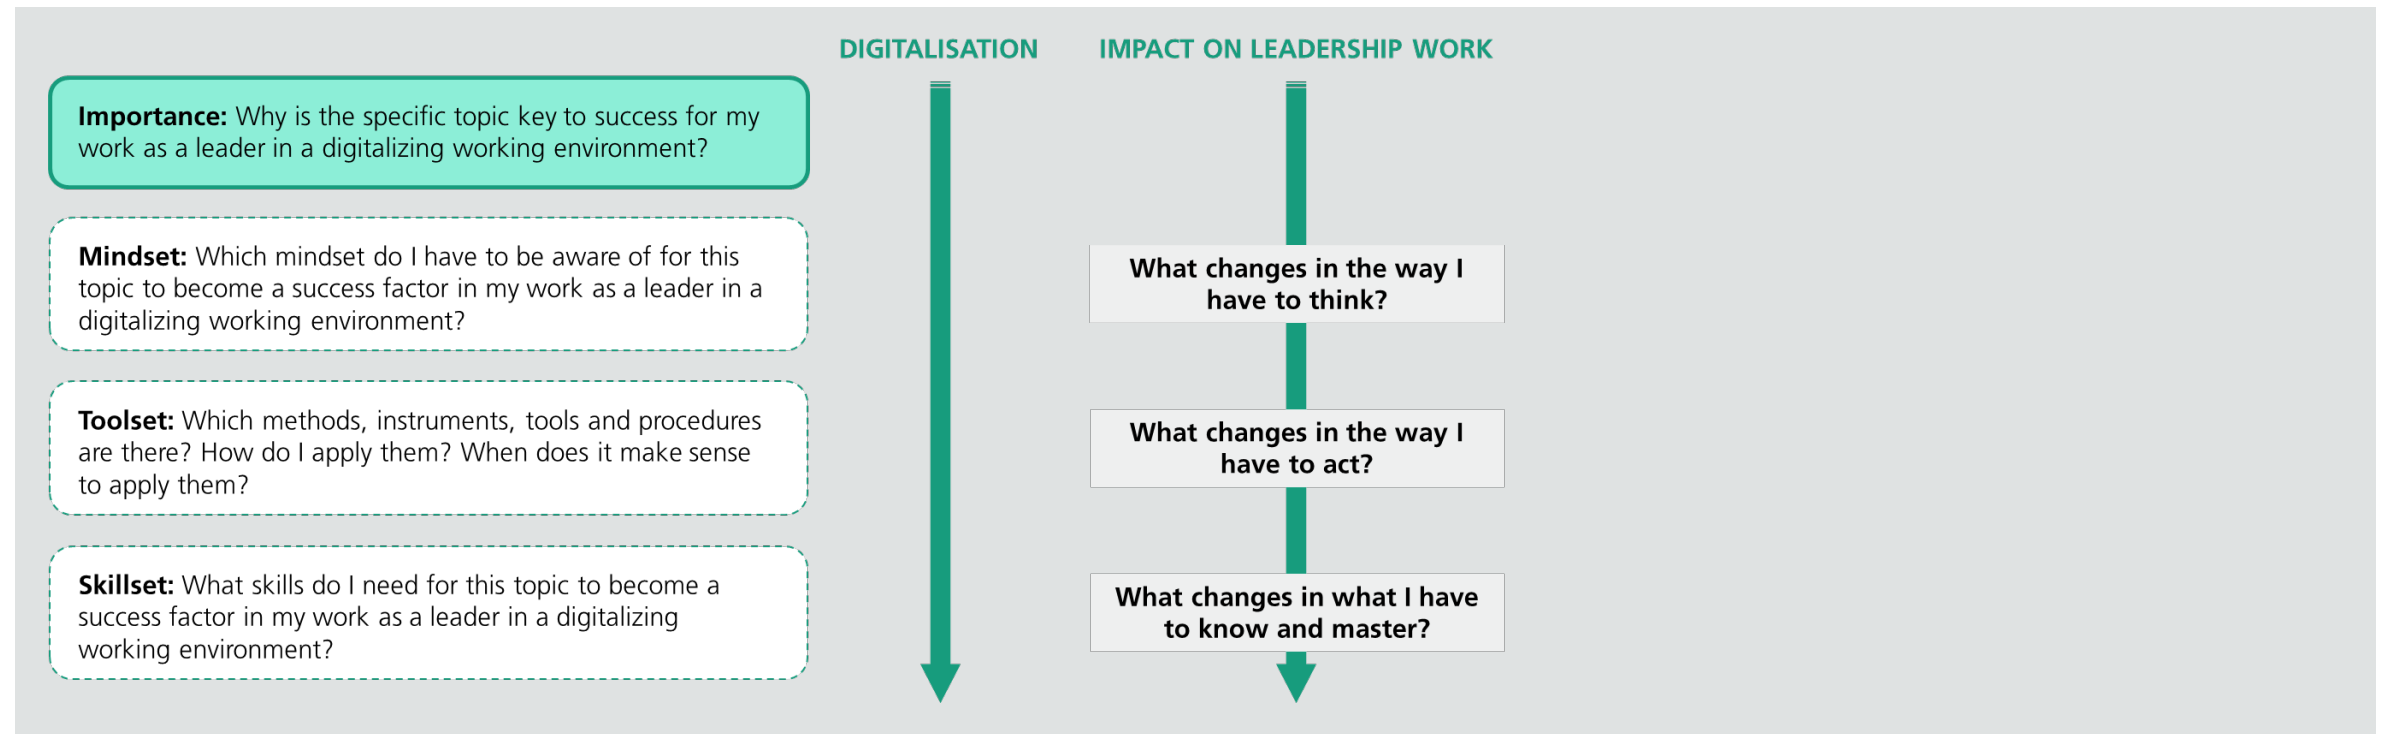

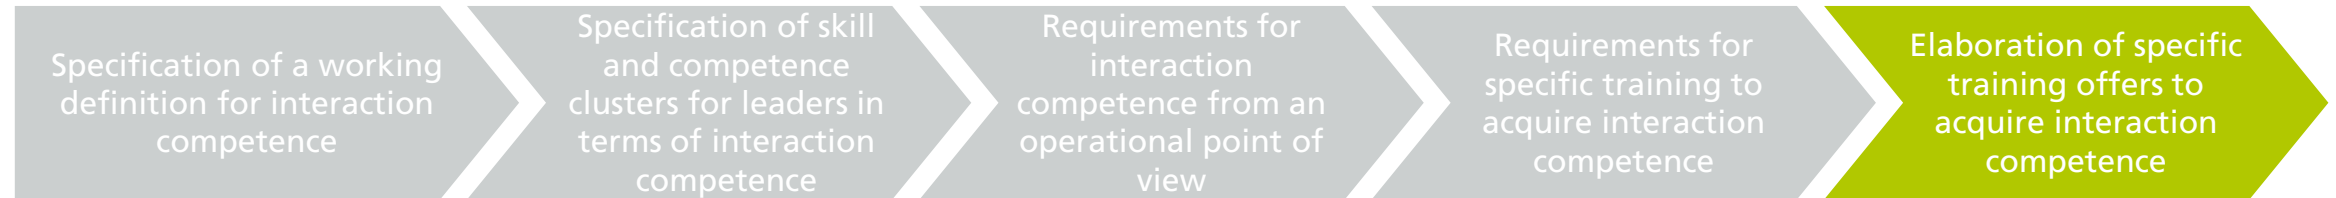

### Pillar 3: Leading Organizations

***Interactional skills  
at institutional level  
(interaction with corporate  
environment)***

Being able to explore, initialize and bring digital innovations to success, and to drive change and new ways of generating value in a digital and volatile business environment.
